Quilter

Discover the freedom of flexible ISAs

Not all ISAs are flexible. At Quilter, we understand that life can be unpredictable.

That's why our flexible ISA offers you the freedom to manage your investments with ease and confidence. Whether you're saving for a rainy day or planning for the future, our flexible ISA adapts to your needs.

What is a flexible ISA?

A flexible ISA allows you to withdraw and replace funds within the same tax year without affecting your annual ISA allowance. This means you can access your money when you need it and still make the most of your tax-free savings. So why choose Quilter?

Full flexibility and control with the ability to choose withdrawal and contribution dates from 1 – 28 of the month.

Link your assets with those of your family members and enjoy a lower effective charge for every person linked with our Family Linking discount.

The confidence to invest early in the tax year, knowing you can access funds in case of an emergency, and replenish them later.

How could a flexible ISA work in action?

Recently retired, Diane and her husband were ready to downsize. They quickly found a smaller house they loved - but in a competitive market, they needed to act fast. They might not be able to sell their home in time to secure the new one.

Diane had already contributed her full £20,000 ISA allowance for the year and held £80,000 in her Quilter flexible ISA. On her adviser's recommendation, she withdrew £60,000 to help fund the new purchase.

When their old home sold later that year, Diane replenished the £60,000 into her ISA. Because it was flexible, the repayment didn't affect her annual allowance, and her full savings were restored.

Case study used is fictional and for illustrative purposes only.

How to get started

Investing in Quilter's flexible ISA is simple. Visit our website for more information or contact your financial adviser to open an account today. Enjoy the peace of mind that comes with knowing your investments are flexible and secure.

The value of your investments can go down as well as up, and you may not get back what you put in.
